with the adoption of a baby boy to complete her family of 6 children. She then raised those children with incredible kindness and value, something that I dream I can one day provide for my family.

Who was the most important influence on you and why? My parents have the strongest influence on me for many reasons. I have always been family oriented, and they have taught me how to be a good person. My dad is very business-oriented and has many talents, so he has made me smarter and wiser in all aspects of life. My mom is very loving and kind, and she has taught me what it means to be a good person, friend, and family member.

Why do you want to be an egg donor? I believe that I have good genetics and can offer something to someone who wants to start a family, seeing as I am not ready to yet. Also the money will be used to pay off my college tuition.
